What's New in the?

Remote PC Locker is an easy to use PC security software that allows you to remotely lock your computer, prevent access to files, hide Windows icon on the desktop and prevent Windows Taskbar from start on unattended boot. The application uses a one time password system and the password can be generated on any third party device like Google authenticator or Yubikey. Even you can use the Remote PC Locker on several computers from a single account. System Requirements: Most computers come with a traditional logon password. The application does not use this method for remote logins. It requires a Yubikey or Google authenticator. The Yubikey is a contactless security key for computers. It works in conjunction with the software. Google authenticator is a free application that works like the Yubikey and can be used as a password authenticator. Features: Remote PC Locker is fully compatible with Windows 8 and Windows 7. Remote PC Locker supports any keyboard and mouse. Use the built-in browser or Google Chrome to perform the remote lockdown operation. After locking the machine, Remote PC Locker can display a custom message and an optional "Reset Password" button to the user. The application can be used from various locations like a Public Computer or a private/home computer. Remote PC Locker can be managed from any third party PC/phone. Remote PC Locker can be started/used even when the computer is locked. It does not need a password to be opened. It uses a one time password system. This is the first step to enable it. Remote PC Locker supports multiple passwords. Remote PC Locker offers a remote unlocking option, which can be used when the user is offline. Remote PC Locker includes a system administrator password that is needed to perform the remote lockdown operation. Remote PC Locker is compatible with a number of mobile devices. When you use the application, you need to tell it your Google and Yubikey security information. The application will unlock the remote computer's mouse, keyboard and Screen so that they can be used to operate the machine in question. Also, the application can be started in Silent mode (ActiveX control). Even if the computer is already locked, Remote PC Locker can display the "Reset Password" option. When "Res
