
Portable IP Watcher Free (Win/Mac)

Portable IP Watcher Crack + [32/64bit] [Updated] 2022

Portable IP Watcher is a FREE portable app developed to help users monitor one or multiple IPs. As a result of your actions, the program will execute a predefined task in case of network changes. This portable version supports Windows XP, Windows Vista and Windows 7. With it, users can monitor multiple IPs at once and a unique log can be kept for each monitored IP. Users can configure the program and configure it to periodically check each IP separately and perform task in case of changes. Also, tasks can be manually configured and users can be provided with a detailed log of all tasks performed for each IP and a detailed log of all actions performed for the entire session. Features of the Portable IP Watcher: * Monitor multiple IPs at once and keep a unique log for each IP. * Configure task and interval if network changes are detected. * Run task or do nothing in case no network changes are detected. * Refresh task or do nothing in case network changes are not detected for a while. * Stop task or do nothing when computer is shut down. * Minimize to the system Tray or launch automatically. * Automatic start when computer is rebooted. * Lots of detailed options and highly customizable. * Includes a full help file. Portable IP Watcher was tested on Windows XP, Windows Vista and Windows 7. It is meant to be used on all versions. How to use Portable IP Watcher (Portable): The application can be used with the following methods: 1. When launched, the program reads an option (see screenshot below) and launches either a task or a drop down menu. 2. If no task is present the program will start to monitor your IPs asynchronously. This is the "do nothing" option. You can use this option if your ping is not configured and your internet connection fails. 3. If a task is configured the program will start to execute the task asynchronously. This is the "do something" option. The "Start task" button and the refresh button are used to execute the current task. 4. Both methods can be called from the Auto Run drop down menu. To use this option, tick "Add a task" in the Auto Run drop down menu. Then fill in the task to run (see screenshots below). To end the program from task you click on the Stop button. 5. If the program

Portable IP Watcher Crack (LifeTime) Activation Code [32/64bit]

★ Fast If you want to be sure that the all-seeing eye on your network will keep its vigilance, then Portable IP Watcher Activation Code is the ideal solution. Its smart scheduling feature makes it ideal for any network administrator or IT officer, while the "ping only" feature is useful for network security. In addition, the program can monitor up to 100 IPs. ★ T... Portable IP Watcher is an easy to use application developed to help users monitor one or multiple IPs and perform certain actions in case the ping fails. The program actually sends a ping at a user-defined interval and provides information on the IP status, while also allowing users to schedule certain actions in case of changes. Portable IP Watcher comprises a very intuitive GUI, showing each monitored IP, status and the user-defined actions that must be performed when the IP status changes. The app allows users to configure both the ping frequency and the timeout interval, while a new IP can be added to the list by inputting the address and the scheduled task. You can launch or close an application, shut down the computer or do nothing, while dedicated options allow you to run the program minimized to Tray and launch it automatically at Windows start. As you can see, Portable IP Watcher is pretty easy to use, so the lack of a help manual shouldn't bother you too much. On the other hand, beginners may need more information on check interval and timeout options, so more documentation could come in very handy in some cases. The CPU footprint is minimal and Portable IP Watcher works fine on all Windows versions, without the need for administrator privileges on Windows 7 workstations. All things considered, Portable IP Watcher does what it says and, what's more, it keeps a user-friendly approach all the time. The straightforward GUI and the reduced number of options make it appropriate for all types of users. If you want to be sure that the all-seeing eye on your network will keep its vigilance, then Portable IP Watcher is the ideal solution. ★ Fast If you want to be sure that the all-seeing eye on your network will keep its vigilance, then Portable IP Watcher is the ideal solution. All things considered, Portable IP Watcher does what it says and, what's more, it keeps a user-friendly approach all the time. The straightforward GUI and the reduced number of options make it appropriate for all types of users. Portable IP Watcher Features: • Monitor one or multiple IPs • Timer functionality • Ping interval • Ping fail timeout • Options to minimize to Tray and auto-launch • Event log • Supports fixed and dynamic IP addresses • User-friendly GUI • Minimized to tray and auto-launch Portable IP Watcher System Requirements: For Windows XP Microsoft.NET Framework 3.0 SP2 Microsoft.NET Framework 2.0 Intel x86 family Less than 1 GB Download Portable IP Watcher Click Download button to proceed to the download page of Portable IP Watcher. All the links are direct download for Windows (including Windows 8, 8.1, and 10) which means that you will have to first locate the download on the page and then click the Download button to start downloading the file in the background. For first time users, we recommend letting

What's New in the?

Portable IP Watcher IP Monitor is a simple and easy to use application that allows users to perform certain actions in case the IP is not reachable. The main feature of the program is that it keeps track of IP addresses and allows users to monitor them by running a scheduled ping. The app works in two modes: on/off, triggered by a check interval. In this way, the user will be notified of an IP unavailability, while the program will allow him or her to do something or nothing. From there, users can configure the options to check for an IP timeout and launch the program minimized to Tray. Portable IP Watcher also allows users to save a list of defined IPs and define a check interval. As you can see, Portable IP Watcher is pretty easy to use, so the lack of a help manual shouldn't bother you too much. On the other hand, beginners may need more information on check interval and timeout options, so more documentation could come in very handy in some cases. The CPU footprint is minimal and Portable IP Watcher works fine on all Windows versions, without the need for administrator privileges on Windows 7 workstations. All things considered, Portable IP Watcher does what it says and, what's more, it keeps a user-friendly approach all the time. The straightforward GUI and the reduced number of options make it appropriate for all types of users. Extras: Portable IP Watcher is portable in nature. A setup & uninstallation guide is included in the downloaded file.
