All the information you need to create an accurate line is contained in the line data, not in AutoCAD, making the process easier and more efficient. This is especially useful when you're creating a project from scratch. For more information, see the Creating Forms section in AutoCAD. (video: 2:03 min.) Create a line drawing and snap to a specific point, with just one click. Use the line snap points tool to connect lines, circles, and arcs to one another. For more information, see the Snapping and Tracing section in AutoCAD. (video: 1:25 min.) Edit and combine drawings with a shared drawing workspace. Shared drawing space lets you continue work in an AutoCAD drawing even when you leave the active drawing and return later.
