Epidural morphine has been shown to be more effective than intravenous morphine in the relief of pain after major orthopedic surgery. Epidural analgesia was studied in 13 male patients undergoing transperineal prostatectomy. The patients were randomized to receive an initial dose of 0.15 mg/kg epidural morphine (n = 6) or 0.25 mg/kg intravenous morphine (n = 7). Additional boluses of 0.05 mg/kg epidural morphine or 0.15 mg/kg intravenous morphine were administered if necessary. During a 4-week follow-up, a patient-controlled analgesia device was available to all patients who requested it. Pain was evaluated by using a verbal rating scale (0 = no pain to 10 = worst pain imaginable). Patients received both epidural and intravenous morphine after their procedure. After 2 weeks of therapy, pain relief was significantly better with epidural morphine (0.0 +/- 0.6) than with

intravenous morphine (3.0 +/- 1.8). The average amount of additional morphine received by patients in the epidural group was significantly less than that by patients in the intravenous group (1.4 +/- 1.0 vs 5.1 ca3bfb1094

God is not a stranger to the intimate relationship of family. God wants to have a relationship with His people. We can come to God in prayer and ask God to have a relationship with us. In other words, we can ask God to be our Father. Asking God to be our Father has the effect of opening up our heart to Him. Our Father Who art in Heaven, hallowed be Thy name. Thy kingdom come, Thy will be done, On earth as it is in Heaven. Give us this day our daily bread. And forgive us our trespasses, as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil. For Thine is the kingdom, the power, and the glory, for ever and ever. Amen. As we pray these prayers to our Father, our hearts are opened up to the intimate relationship we have with Him. As we pray, we need to ask
