Fortress Forever is a team and class based multiplayer game in which two teams, each with nine classes, face off to control a fortress and ultimately capture a flag. During the game, each team must first complete several challenges in a fortress, earning points and triggering increasing difficulty levels, while competing for the flag. Teams gain a score by capturing the enemy flag and gaining supply drops when its capture location is attacked. All nine classes (as well as civilians) have unique abilities and skills which affect gameplay, team balance, and the strategic aspects of gameplay. A new strategic dimension to team based FPS games such as Halo and

Unreal Tournament Besides the challenges, the game also features several additional features, such as the ability to change the game rules mid-game. The game also features a map editor and scripting language that allows users to create their own game levels.

Team Fortress 2/Forge modifications This is a modification of the game "Fortress Forever" intended to be used in conjunction with "Forge" and to be used as a foundation for development. While "Fortress Forever" is a singleplayer game with numerous map-encoded challenges, the Forge version is essentially the multiplayer version of the game. "Fortress Forever" contains a variety of maps, each of which contains one challenge, and those challenges will either be

activated upon a player entering a map, after a few seconds of inactivity, or when a flag is captured. On the other hand, Forge maps will be played automatically after a short period of time, and contains no flags.

Forge variants

The Fortress Forever mod team is dedicated to the development and release of exciting new features for the Forge mod. This will result in the mod being updated frequently. Soon, players will be able to edit the game itself using the mod's map editor. A major development milestone is marked when mod team members can create custom classes. For example, a rocket launcher will soon be created for the Pyro class. A aptly named "Rocket Launcher Pyro", the rocket launcher will simply fire a

rocket for a short time when pressed. The mod team will continue to release new features in the future. When possible, the features will be released first on the Forge branch of Fortress Forever and then ported to the main branch.

Q: Why doesn't the Forge mode have an editor? A: While the developers were working on the mod, they were able to spend considerable time on the underlying engine. While the mod and Forge versions of the game will be very similar, there will be a few minor differences

What's new in Castle Torgeath Redux:

DVD £12.99 In 1990, an American serial murderer known as the 'Corpse Killer' rose to prominence after killing 11 women in the state of Texas alone. The spread of the investigation, which the FBI dubbed America's 'Most Prolific Serial Murderer', exploded on to the national consciousness. The man who would become known as the 'zombie killer' was, of course, Dennis Rader. In this DVD, performed by Dirk Maggs, Robert Bauer and Terry Jenkins, the crime story is told through interviews with those who were affected by the horror of the 1982 murders.

Introduction Introduction It is the case of two-fisted investigator Phillip Garrido who took justice into his own hands in 1980. This was the first time that the 'Corpse Killer' had killed in California, and when police accused him of killing 11 women in Texas, it kickstarted a multi-state investigation that would become one of the most lurid and reported in the 20th century. But before the murder spree began, will Robert Bauer and Patrick Fitzpatrick reveal the

true nature of Dennis Rader, and why were his mother and stepfather obsessed with murder? Known also as the 'Corpse Killer', Rader was born Dennis Morgan Heathcott on December 29, 1952 in Long Beach, Los Angeles County, California. He claims to have suffered severe emotional and physical abuse from his mother when growing up. "She would beat me if I wet the bed or if I saw a bloody nose. If she didn't see anything, she would beat me until she saw something." The truth is, however, that Dennis' biological mother had given up, and put him in the permanent care of his stepfather and stepbrother the week before he was born. The stepfather also blamed his wife, and when Dennis was eight, he was sent to live with his father, David Heathcott, and his wife Betty in a Mormon home in Utah. David Heathcott was an alcoholic, and he offered little support to his son and adopted daughter. So, when Dennis returned to California after a brief visit with his parents, he went on a bender, fleeing from the cops and stealing from shops. At the age of 13, Dennis was committed
