OLDEST NEWEST GAMEPLAY □□□ First battle. A battle starts with a weapon and a shield. In the game, you control all your action through words and gestures. The game lets you pick a fighting style and skill to attack with. To do this, you select your weapon from a weapon set which has a combination of three weapons: broadsword, one-handed sword, and polearm. As you engage in battle, there are different options to see how many times your attack hits. You can try a command called "Effective Attack" which is a combination of the three elements. Alternatively, you can use a skill called "Game of Ten" which counts down from 10 in battle, and if you manage to press the button, your attack will be super effective. □□ How to touch in the game.
