1) Online Play: Battle with Heroes, Summon Monsters to Deal Damage or Power Up, Sunday, October 24, 2013 MC-3 Update So, I've had some time to play with the MC-3. The receiver has been mounted on a tripod and is now able to receive at short (or long) range in the "on-trail" (i.e. tire footprint) position. I've been experimenting with using the receiver to track vehicles in the foot print and also with tracking vehicles in motion. I've been very pleased with the results, but I have a few things to work on in the future. The first thing is that it's really, really hard to focus the receiver on a small target moving rapidly in the foot print with the MC-3. I'm using an inexpensive arduino microcontroller to control the receiver and initial testing shows that is really slow in responding to changes in position. It's slow in converting from analog to digital signals and it's slow in switching digital channels. I'm also having trouble staying on the same frequency and nothing I've tried is working. I have to have the receiver on three different frequencies in order to track vehicles going forward and backward or side-to-side. I have five cameras right now and I'm using an arduino to switch between them. It would be much faster to have a single receiver that could be focused on the vehicle and have the signal be converted to a digital signal on the fly. I've also been playing with the angle the receiver is mounted to the side of the vehicle. The receiver will track vehicles moving in any angle up to 30 degrees to either side or front or back of the vehicle. As my frame of reference, the direction the vehicle is moving is front forward, so the receiver is also called on-trail. If I were to mount the receiver on the end of a tiller, the receiver would be called trail-cam. When you want to track something that has a longer range of movement, you would use a steeper angle of mount and call it off-lead. One question I have about this is, if you want to track something for multiple miles, how do you differentiate between when the object is in front, back, or one side of the vehicle and the other side? Do you have to switch the receivers to different angle or time the receipt of a signal between the receivers? I'd like to mount more than

## **What's new in Elden Ring:**

**Wesley Westin - INFLIGHT** Music played when you reach the destination Being alone when you're in a crowd, being ostracized when you're accepted How many people really care about you? It was all a lie It's in your head, so why not jump out and show them what you're capable of? Come on, there's no shame in being flexible This world doesn't just accept you, you have to work hard and make them believe it

**Nana D - Red Cameo** "I'm not losing my mind; they're pulling up the carpet and all my memories are on display. I just wanted to create more self-expression. I still have a conscience, and the normal what-ifs come with that. Still, even though I've lost a part of me, there's something inside that can't be contained, and I'll continue fighting."

**Wesley Westin - Divided** This is a song where the singer is thinking about how he is being perceived by the other person. That's not a loving heart. It's a monster that's hiding behind its humanity.

**Nana D - Divided** "In the morning I studied at coffee shops and drank several boxes of sugar, and that was okay with me. I couldn't conquer that world with only my mind, and I had to do it with my hands. One by one I went around and inspired people with my music. I suffered through it, but I was taking no prisoners. If you can't create what you want, be mad at yourself. It's just my opinion but good people don't leave, even if you don't love them back.

Elden Ring (Elden Ring или Elden Ring) (formerly known as Tarnished) is an upcoming online role-playing game developed by Italian studio Hinterland Productions and is being published by Nordic Games. It was announced during Sony's PSX show in December 2018. Elden Ring is a fantasy action role-playing game which is set in a post-apocalyptic fantasy world in a time period in which magic has returned to this world, and is played both locally and online with up to 16 players. The game is reportedly set in an alternate version of the Warhammer Universe. In the year 1555 Tarkir, a world that once used to be ruled by magic, suffered a cataclysmic event, after which the magic that once sparked all life disappeared. The Magic, the source of all life, is now gone, and civilization has disappeared as well. But a way of life still lingers, called the Elden Rings, which are a seemingly unending source of energy, stored in concentric circles like an onion. It's up to Elden Lords to lead the world, and act as guardians of the universal order. The main goal of this guide is to help you configure your gameplay through a 6.5GB mod version, provided by the game's official website and the modding tool. Some images in the guide might be misleading for those who don't speak Italian, so I'll provide you with a detailed review of all of them.
