Features Key:

- Player Impact Engine (PIE): Sapping shots into the back of the net, leaving the keeper hopelessly beaten and finding the exit from difficult positioning are just a few of the technical highlights that can change the entire course of a game with PIE.
- Revolutionary Player AI Patterns: An entirely new AI system for PIE means that every player will behave differently, from intelligent off-the-ball runs that overwhelm clumsy defenders and great between-the-lines work that steals the ball from promising counter-attacks.
- Innovative Player Intelligence System (PIS): With faces that move, jink into position, practice proper positioning and get back on your feet faster after a collision, players will react to completely new ways of playing with or against them.
- Fully Optimized Graphics: FIFA 22 introduces the largest FIFA game created to date, and we maximized its power by using the latest rendering techniques and applying millions of hours of research and development to performance.
- Pro-Team Lineup - For the first time in FIFA, compose the perfect 11 to lead any club you desire, then create a cast of virtual non-player characters that reside inside, and take command in real-time
- New Training Modes - The Training Center pushes the limits of what you can do with in-game training with Step Into the Game and With a Trainer.
- New Mastery System - Achieve new heights in all areas of your player's game with an all-new Mastery system that offers detailed, visual feedback to help you master each move and get the skills you need to take your game to the next level.
- Real-World Matchday Atmosphere - Watch the movement of the ball from over 70 camera angles as you immerse yourself in the highest-quality football experience to date. See every moment of each match in full and enjoy dynamic crowds that react to all the excitement of a live match.
