

Much of what we've seen is either on-field movement animation or changes to the ball itself. I'm not convinced that FUT has the variety of movement between players that I'm looking for. I'm not just talking about the typically broad movements between players during ground duels - I am looking for more specific and realistic movements that will inform my play style. Realism in gameplay is key, and I haven't seen the variety of movement necessary to truly create a realistic on-field experience. For example, in real life a defensive midfielder and defensive midfielder really don't have a natural guard position of each other. However, in FUT both those players are often defaulting into each other. That's pretty dull gameplay, and it seems that movement animations are no different. I know the ball can have more animations to cover this kind of detail and realism, but I don't have the time to get into more detail. Some of the moves are nice. You'll see a player run into the ball, fall to the ground after colliding with it, and then spring back up again. It's an animation that almost mirrors the movement of a player running up and across the ball. It shows off the crazy amount of detail that this game has, but it's impractical for the average player. Perhaps the average player can make the sequence work because it gets an aggressive, vicious forward run by a player and results in a key pass to a running player, but if they're going to run an animation like this, it should have a reason behind it. I think if this kind of animation was added to the ball, not only could it make it more realistic, it could allow us to make more risky decisions on the field. While I've heard people say this game is based off of motion capture, there hasn't been any confirmation if the game has used real-life statistics from professional players or if it's just off-set animation. Either way, it seems very odd to me that the developers would rely on cutscenes and other in-game storytelling to tell the story of the game. In real life, players have their own unique personality traits that go into their performances. For example, one player might be a tenacious tackler, while another might be a forward-pushing defender. One might be good at finding the right pass,
