I'm trying to migrate my setup to textmate, but I'm having a problem with one particular.txt file, that I end up having to remove the first tabbed line of each file, in order to get the rest of the file to line up. The.txt file is formatted like this: 1. word 2. word 3. word etc The first line is always

removed, as if the 1. word wasn't there, and the rest of the file is all wrong. I would like to have the whole line remain in the file. Is there any way to do this in textmate? A: Hold the shift-left arrow key as you type to insert the
