Patchwork Image - is a logical educational game that develops logic and imagination, where you have to collect patterns of different levels of complexity from geometric shapes of different shapes and sizes. The game consists of 35 levels, from the simplest to the most difficult. Each level displays the silhouette of the image and a set of shapes, you have to choose the right shape and specify the correct angle and position on the silhouette. As soon as all the pieces are put in their places, the level will be completed. All control is done with the mouse. First, click on the shape to select the desired shape, then move the shape to the desired location. Second, if you want to change the angle of the selected shape, hold the left mouse button outside the shape and swipe around the shape. The shape will change the angle by rotating around its axis. Third, drag the shape with the adjusted rotation angle to the desired position of the silhouette, if everything is done

correctly, then the shape will stand in the right place. If the shape is already in the right place, then you need to click on it again to confirm the action. Some general tips for the game: It is recommended to make the best possible first level where the shapes may appear in random positions. On subsequent levels, the shapes appear in the required position, of course, you can draw them, if you want. If you want to practice, then it's easier to draw the shapes yourself, and then to place them in the silhouette. What's more, you can build a collection and show it to a friend, so that you can share your creativity. This game is really easy and requires absolutely no practice. The game is suitable for any age group. Meditative gameplay. Fun to play with kids. About The Game Patchwork Image: Patchwork Image - is a logical educational game that develops logic and imagination, where you have to collect patterns of different levels of complexity from geometric shapes of different shapes and sizes. The game consists of 35 levels, from the simplest to the most difficult. Each level displays the silhouette of the image and a set of shapes, you have to choose the right shape and

specify the correct angle and position on the silhouette. As soon as all the pieces are put in their places, the level will be completed. All control is done with the mouse. First, click on the shape to select the desired shape, then move the shape to the desired location. Second, if you want to change the angle of the selected shape,

✓ Crosswords included: The traditional crossword puzzle where you are given a grid of letters and a four letter word. Add the appropriate letter in each square and you complete the puzzle. ✓ Jigsaws included: Sliding puzzle (Jigsaws), Puzzle is a guessing game. There are special pieces that require a specific number of times to move from one square to the next. When you see the right number of moves required, you are then presented with a key to reveal what is hidden underneath. ✓ Word Searches included: Word search. This is classic puzzle, where you are presented with a crossword type grid and one or more words in each square. The word (s) in the square must be found by matching letter by letter with letters in the grid. ✓ Concentration games included: Concentration: In this game, the object is to eliminate as many of the disks as you can in 90 seconds. In each round the difficulty level increases by three disks until you are faced with the impossible task of trying to eliminate 12 disks in 90 seconds. ✓ Word games included: Word Game: In this challenging word game players are presented with a series of letters.

Players must choose one of the four letters and can erase the letter once chosen. The players that eliminate the correct letter quickly will win the game, the time will stop for all players. ✓ Logic games: Logic game: Two different colored disks are shown to the players. The disks can be placed on the board and letters can be added to the first letter of the words on the board. Players may add letters in the correct order and must try to eliminate the blocks to win the game. ✓ Gameboard: You are given a board with some letters in each row and columns. You can place a block of letters and you will then be asked to figure out which letters you can ignore. There is no time limit and the game is one to one, if you are not able to solve the puzzle the game will stop. ✓ Santa Cat Sister: My companion for this joyful game is Santa Cat, who now owns her own sleigh, and her beloved sleigh dogs. Santa Cat looks after them during the Christmas holidays. She will travel to the North Pole and bring them back as she is full of Christmas spirit. ✓ Merry Christmas: This is one of the finest Christmas puzzle available in the market today. The gameboard is divided into five fun sections; Santa's Workshop,
