How can I find the serial number? I've purchased Stronghold Crusader from the site, I have just downloaded and installed it on my computer but I can't find the serial number anywhere on my device, is there any way to find it?. A: It is stored in a file "8182680.symbols" located in the folder {Program Files}\Stronghold Crusader\[Version number]. For Stronghold Crusader Extreme 2008 it should be: {Program Files}\Stronghold Crusader\Stronghold Crusader Extreme 2008\8182680.symbols But it might also be located in the folder {Program Files}\Stronghold Crusader\[Version number].\8182680.symbols depending on what version you have installed. You could also try this site: (its a bit old, but the basic information about how to do so should be still valid). You could also try Google: "stronghold crusader 2008 serial key 8182680.symbols" which we find especially problematic in the epistemological domain, but it is, for example, everywhere in philosophy. Both are deeply wrong because they imply that human beings have an inner and only inner world. They imply that morality is only related to people's emotions, their emotions alone, and not related to their cognitive or rational decisions. But for you to see good or evil in your neighbour, it doesn't matter what he or she thinks, you simply need to empathise. I would always rather believe what I think is right

than what I think is wrong. I would always rather discover a true statement than an error. A true statement doesn't need any excuse. But a wrong thought in its turn doesn't need any justification. If you want to think of "evil" as the result of a kind of innate flaw, you are moving in the direction of the famous account in which, no matter the circumstances, people were condemned to evil because of their nature. I don't subscribe to this view. That is why I am sometimes accused of being a racist or a "Victorian". I also argue that people can't be judged.
