

[Download](#)

- Allows routing of LAN, WAN and Internet traffic for any type of business, educational, or military complex. - Allows the creation and management of LAN segments and/or WAN segments. - All users can have different types of access levels, based on IP address, MAC address, or both. - The IPS is able to control the outgoing bandwidth by assigning a specific limit (in a percentage of total traffic allowed or as a fixed limit) to each user. - WOOWEB-PRO Activation Code is an easy-to-use firewall with integrated logging. It is ideal for companies where it is necessary to filter all internet access. - The WOOWEB-PRO can also monitor the traffic in real time, and log it in a very sophisticated way with differential of fields. - It is possible to define outbound classes for specific IP addresses that have to be accepted or denied. - Each user has an IP address that will be the only one that will be able to initiate outbound connections. - Outbound connections can be time-limited and logged for record purposes. - I/O (in and out) ports of the WOOWEB-PRO can be monitored. - IPS allows you to collect massive amounts of data, of a very high quality. - IPS has the capability to apply AAA to enable filtering and authentication of connections. - IPS can log events of outbound traffic. - You can also allow incoming connections by IP address or by a user-defined list of IP addresses. - IPS is very easy to use. With just a few clicks you can start filtering and/or managing your internet traffic. Disclaimer: All logos and names used on this website are registered trademarks of their respective companies. WOOWEB-PRO is a firewall and router software providing a solution at the corporate level for outbound and inbound Internet access. It transforms any computer into a powerful high-level multiple-port router with advanced filtering, tight management, and large log recording. WOOWEB-PRO Features: Firewall : - Access to the Internet and Local network. - Block and allow Internet traffic. - Protects against viruses. - Block and allow internal network traffic. - Block and allow fixed remote access from your LAN to any devices outside the LAN. - Can be configured in LAN or Remote. - Can be configured to allow the remote access to a user, a computer or a fixed IP. - The user name and the password of the remote access can be changed from time to time. - Can be configured to control the access of specific IP addresses. - Can be configured to make the firewall operate in Software or Hardware mode. - Can be configured to make the firewall operate in NAT or Port Forwarding mode. - Can be configured to let a remote client to monitor the firewall status at any time. - Can be configured to let you manage the firewall dynamically from a remote web browser without having to logon to the computer. - Integrated Logging tools. - IP based Routing to protect Local network from Internet traffic. - Firewall logs remote access. - See the user IP address, the remote port, the remote computer name, the remote computer connection type, the remote computer date and time, the remote computer user name and their last connection attempt. - Block and allow IP ranges. - Can be locked down so the administrator cannot see the logs. DNS : - The address of the default DNS server can be changed from time to time. - The DNS server is supported by WOOWEB-PRO for outbound Internet traffic only. Host / IP : - Setup DNS and/or proxy host or IP address to access the internet. - Setup the DNS or proxy host and IP address to access the internet

---

to the different computers that need access to the Internet. Printer : - Print directly from the web browser. - Print remotely from the web browser. - Connect to the printer via the TCP/IP protocol. - Setup the IP address and b7e8fdf5c8

WOOWEB-PRO is firewall software designed to control inbound and outbound Internet access for your computer or server. WOOWEB-PRO includes powerful features such as large-scale log recording for analysis, firewall rules based on URL or domain names for easy access control and management of traffic to, from, and within your organization, proxy support and many other benefits. WOOWEB-PRO is also a pre-configured router and both firewall software and router software. If your computer or server needs more than basic firewall protection, WOOWEB-PRO is the solution. More over, WOOWEB-PRO offers a high level of customization including fine-tuning of configurations and rules, VPN support, IP address management, unlimited outbound connections, use of unique and anonymous VPN IP addresses, and much more. – Traffic Director - 1.0 is a firewall and traffic management solution that allows you to control and filter outbound and inbound traffic on a network. – The program includes five different browsers that are fully customizable. – It's easy to use and anybody can manage it. \* Features \* Traffic Director has a built-in web server that allows you to control the access of your users and computers to the Internet. \* Firewall \* There are two distinct firewall systems in Traffic Director: an active firewall that deals with all incoming and outgoing traffic and a basic security system to protect your computer from intruders. \* Virtual proxies \* Users can be redirected to multiple destinations by using virtual proxies. In fact, this has never been easier, more transparent, and more flexible than in Traffic Director. \* Logging \* Traffic Director stores logs for three different purposes: system events, filter events, and general settings. \* Interface \* Traffic Director uses a familiar and user-friendly interface. All windows have easy-to-use functions. \* Security \* Traffic Director can protect your computers and users from unwanted access to the Internet. In addition, it provides an additional security layer. Agile Version Control System for Windows Servers, an indispensable tool for developers and system administrators. As a continuous version control system, it can handle almost any SCM-based workflow: frequent commits, rebases, merges, branching, tagging, etc. It supports almost any VCS-related workflows: Sync a server with more than one project, Manage branches, Merge tags, and so on. What

#### What's New in the WOOWEB-PRO?

WOOWEB-PRO was designed by a group of security experts and on-line marketers to provide a solution for those that have no idea about what a firewall is and how it works. WOOWEB-PRO was developed to be easily configurable, with tools that are self-explanatory. There is no need for network engineering skills to configure WOOWEB-PRO. Thus, new personnel can setup WOOWEB-PRO on a company PC in a few minutes. This means a significant cost saving in comparison to the time that would be spent configuring the same system with other firewall software. WOOWEB-PRO is very simple to manage by administrators, who will only need to change a few parameters and rules, such as the port number to use. WOOWEB-PRO includes a large number of predefined filters, including SSHD rules, TRAP rules, RULE rules, SMTP rules,...plus many others and a set of advanced rules. WOOWEB-PRO provides deep analysis of your data and implements a large number of security software such as: ...and many more. Some analysis software are even available at no cost. Please note that WOOWEB-PRO does not include a NAT algorithm, but it is possible to connect to the WOOWEB-PRO web server by creating a local SOCKS proxy server. In addition to the web server, WOOWEB-PRO also includes a powerful and very comprehensive management web interface to control WOOWEB-PRO from any Internet connected computer or mobile device. Features: Reliability The application is running 24/7 in the background and is designed to record all of your IP traffic in real time. It works perfectly on any computer platform,

---

even on those with multiple processors. Very easy configurable WOOWEB-PRO is a very easy to use firewall, thanks to the following features: - Every WOOWEB-PRO filter can be configured individually and without any need for root access (or root-based software) - WOOWEB-PRO can be configured from the command line, which means that administration can be very easily achieved using a simple text file. In addition, parameters can be easily changed from the command line. - It does not require a web server (WOOWEB-PRO is a standalone application) - Log files are kept in memory, in order to guarantee speed of

---

**System Requirements For WOOWEB-PRO:**

Supported OS: Windows 7/8/8.1/10 Windows Server 2008 R2/2012/2012 R2/2012 R2 Service Pack 1 Windows 8.1/10 Technical Preview Mac OS X v10.9.3 or later Linux Kernel v3.14 or later Minimum 8 GB of RAM 10 GB of disk space HDD: Recommended 128 GB Processor: Intel Core i3-2120 @ 2.13GHz or Intel
