Photoshop is the de-facto standard for photo editing on both Windows and macOS. Photoshop can be used to edit photos on a desktop computer but these days is also available on mobile phones. While Photoshop is the most popular graphics editor, there are many alternatives, including: Gimp is the most popular open-source image editing software and is free to use for both hobbyists and commercial purposes. It's built using a modular design. Gimp is able to import and export a wide variety of image and video formats. Software Description: GIMP is a general-purpose (image) graphics editor which is free and open source. It can be used to edit photographs, illustrations, maps, drawings, logos or any other kind of raster graphics image. It is cross-platform and runs on many Unix-like operating systems including Linux, BSD, macOS and Windows. The official website shows downloads, installation instructions and a list of GIMP contributors. Google has a creative software suite, including a web editor and an image editor: Pixelmator. Pixelmator is a pixel-based drawing and editing software, that works in both 2D and 3D with a drag-and-drop interface. Google Pixelmator was originally conceived as a browser-based app, with a focus on a pixel-perfect web-based canvas. SketchUp Pro is a commercial application for 2D and 3D drafting and design. It is compatible with Windows, macOS and iOS. SketchUp includes powerful 3D modeling and drawing tools as well as a visual interface. SketchUp is available for both beginners and professional users. Painting.net is an online image editor. It supports some basic photo editing functions such as cropping, resizing, and red-eye removal. It also has advanced tools for adjusting lighting, correcting color, and retouching. Photoshop is the de-facto standard for photo editing on both Windows and macOS. Photoshop can be used to edit photos on a desktop computer but these days is also available on mobile phones. Photoshops features include: Panorama creation Geomagnetism removal Color adjustments Auto-leveling Photo montage creation Frames Photo cropping Colored borders Copyright Photo Effects Face removal Photo editing Photo correction Adobe Photoshop 05a79cecff

TRB's Mission Is 'To Establish a System of Quality Roads to Meet the Transportation Needs of Current and Future Customers' The Transportation Research Board (TRB) is a US government agency and is responsible for the development of the human, transportation and environmental science and technology needed to meet the challenges of an environmentally sound transportation system. TRB is an independent agency established by Congress in 1970. As the premier transportation research organization, TRB assists with the development of new and innovative technologies to improve safety, security, and energy efficiency. Today, the TRB is responsible for guiding new transportation technology across a continuum of meaningful programs, including research, evaluation, and funding opportunities. In recent years, the TRB has expanded its mission to include the oversight of all transportation research and development. It is composed of 33 members appointed by the President and confirmed by the Senate. Nineteen of the members are appointed by the Department of Transportation, one by the Department of Energy, and one by the National Science Foundation. The remaining 14 members, who are appointed by the President, are the heads of the 30 federal agencies and departments that fund transportation research. Members from the private sector are also eligible for appointment to the TRB. During fiscal year 2015, the TRB awarded approximately $202 million in grants and contracts on behalf of the federal government. Methodology TRB commissioned us to collect information and data on how members of the TRB view and use their research programs, as well as their opinions on the policy processes of the TRB. This includes: Members' uses of and views on the TRB How they use the various research programs in the TRB What research goals they pursue and what priorities they see as most important The distribution of the budgets in each of the TRB's three major programs: research, education and training, and technology and innovation Respondents were not given the option to complete the survey twice; we have therefore included only a single set of data for each respondent. We calculated the percentages by dividing the number of respondents who answered a particular question by the total number of respondents who took the survey. All percentages are rounded. The survey was sent by email to all of the TRB's current members (approximately 622) and to each member of the TRB's board of governors. Respondents TRB members eligible for this survey include all
