Main Page .Neckbeards: Basement Arena is non-stop action for one or two players with an epic soundtrack and a taste for psychedelia. Based on classic arcade games like Robotron 2084, Neckbeards is non-stop action for one or two players with an epic soundtrack and a taste for psychedelia. Choose your champion from a posse of amazing protagonists, including a badass beta male, a racy spinster, and a fearsome basement dweller (with mad punching skills!). Face a hundred levels full of insane Chads, trolls, and hundreds of other foes. Protect mom in the garden levels or you'll never, ever get dessert again! Do mortal battle with special enemies, each more special (and weird) than the last! Heal your wounds with some delicious junk food or high-quality medicinal herb! Clear each level in time - or face the fearsome school shooter (created, in part, by those bullying antagonists). Basement Arena gameplay You have two options to choose from while playing: [Normal play] plays exactly as the name suggests: battles are extremely short, there are no power-ups or extra lives, the levels are simple, the enemies are simple, and the gameplay is easy and fun. [Hard mode] plays much like Super Smash Bros., but enemies are much more vicious (even by the game's standards) and levels are much longer. Doesn't that sound perfect? Unfortunately, as of version 0.4.3, Neckbeards: Basement Arena's gameplay has been changed to a lot of nothing! Stay tuned, because we'll soon be releasing a major update with lots of new content! For now, the only change is a much, much

faster gameplay. When you're all done fighting, turn around and enjoy the basement. Don't forget to pick up some nice snacks while you're there. .Neckbeards: Basement Arena soundtrack The soundtrack is still in progress. All the music is sung by Lady Fickle. MUSIC [Hard mode] • • (I can also upload different versions of music for your convenience. Just tell me in a review if you'd like me to do that.) Here's some awesome music from J. McPhee! "You were supposed to pass me a note or something, but instead you just go through life feeding off my power." •

However, it appears that the next iPhone (code-named "iPhone 5") may in fact be delayed again, reportedly well into next year. The reason for the delay? Apple is reportedly having some trouble fitting the 3D sensor into the 4-inch iPhone, although these issues are said to have been fixed in recent weeks. This remains to be seen as 3D-ready iOS devices are not yet available, so it may be some time before iPhone 5 is ready to come out. It is being reported that Apple may follow the same strategy as other manufacturers, such as the 3D-ready Xbox 360, by bund
