After changing the PAL channel from 23 to 24, I was immediately able to adjust the color of the clips on the timeline itself. I had no idea if I had to adjust my master clip manually to adjust the white balance, or if I could just change the color of the clip to match the new color. After changing the PAL channel from 23 to 24, I was immediately able to adjust the color of the clips on the timeline itself. I had no idea if I had to adjust my master clip manually to adjust the white balance, or if I could just change the color of the clip to match the new color. That's when I decided to launch the video effects menu: "Colorize" and "Hue Shift". These two options did the trick (without applying Gamma). Here's an example of what the effect looks like (notice the tint to the video): 7 last 12 minutos - by Tunki Manjai Before changing the PAL channel from 23 to 24, I was immediately able to adjust the color of the clips on the timeline itself. I had no idea if I had to adjust my master clip manually to adjust the white balance, or if I could just change the color of the clip to match the new color. That's when I decided to launch the video effects menu: "Colorize" and "Hue Shift". These two options did the trick (without applying Gamma). Here's an example of what the effect looks like (notice the tint to the video): movie takin cineva full test (test feedback) movie takin cineva full test (test feedback) Before changing the PAL channel from 23 to 24, I was immediately able to adjust the color of the clips on the timeline itself. I had no idea if I had to adjust my master clip manually to adjust the white balance, or if I could just change the color of the clip to match the new color. That's when I decided to launch the video effects menu: "Colorize" and "Hue Shift". These two options did the trick (without applying Gamma).
