The story is a dark and gloomy forest, where loneliness stands over you. There are no people. Where there are no more people. There are monsters. The horde of monsters waits for you to meet them. You are the last human being. If you don't want to be alone in this forest - You must agree with your friends to survive. Of course, there will be five rounds, which will allow you to survive in the horrible forest. Each round will be worse than the previous one, and at the end of the fifth round, not everyone will survive. Each round there will be something that can help you pass it, and if you manage to do it - You will survive the round. Each round will be more difficult than the previous one. To solve puzzles you must be a team. Decide who are the real friends. You must prepare for the worst, fight monsters, find a way to save yourself. It is the time to run for the life. Controls: You will need the WASD keybords. You can change the controls by default setting "LocalControls = false" on startup. Merchant - Boost Potion Recipes Features Key:

- German
- C&C3&E battle
- 4 fully localized missions
- 2 operation modes
- Command options to be adapted to the NDRE
- Modern day and Soviet era based defense models
- No Bushi trees

About this DLC

- This DLC is for the Germans in the game. The map is entirely new (different environment, units and buildings). It replaces M48A1 Patton with an exclusive version with lots of new units and many other re-skinned and re-textured units like the Napoleon DIV2B, Grizzly FV4202c, French FV4202c, Panther G 42, Panther V, Leopard 1A6 and many others.
- Tanes own way of combining engineering and combat was born here. They are unit types that have no vehicle with which the engineer could be mounted. But they can also be used effectively as fully fledged units in the combat. This is done by simply reducing the combat capabilities. The re-skinned units are easy in combat and they can easily destroy opposition units without too much risk.
- The Federal National Redoubt is always a real challenge for the Americans. With this DLC we are in the sense of closing the one door, but the opening in to the one of the two rooms. So first, the map has a map generator. The generator creates the terrain itself so you only need to place the buildings you want on the map. The seams are invisible so this way you can choose for yourself, in which way you want the layout to look like.
- The missions are a variant of the old showdown game. We have four new tasks. To complete missions one will require more troops than on other maps. This allows us to hit us with an army of efficient and speedy units with little troop numbers. So its more of a German, but with the reward of the Americans.

- Tales From The Abyss Episode 38 & 39 June 13th, 2017 Mystic Pillars is a new indie game by Japanese developer, Kyosuke Yoda. Based on an interface of traditional board game, the gameplay of the game is centered around the puzzle concept. With the same interface as a traditional board game, the player is trapped in a setting of only geometry, which is composed of selectable blocks for the player to build on. Imbued with the concept of board game, this game has the unique feature of allowing player to change scenery to achieve different modes of gameplay. Mystic Pillars has several modes of gameplay that suits different types of player. There's a story mode in which the gameplay revolves around solving puzzles based on the story. There's also a puzzle mode in which player can simply choose his favorite puzzles from many available on the game and then solves them in order to gain bonus points. Then there's a puzzle solver where player is required to solve puzzles within set time and received with points based on the solve time. The story is about a treasure hunt that featured player being lost in his new world. In his parallel life, the player adventure as a hero of a fantasy world. To bring his world back to his world, he must solve a series of puzzles to defeat the sorcerer Aldos. To complete the task, player must find key to unlock the portal between two world. I personally like both story and puzzle modes. The story mode was a winner in my eyes. The puzzles are level-based and consist of few number of puzzles. Having said so, puzzles can definitely be frustrating. In my opinion, the creators should have added more puzzles to the story mode, to make the game more engaging. However in the end, the game is a nice light diversion. One thing I discovered is that Mystic Pillars allow the player to pause the game whenever he feels like. In order to continue with the puzzle, player must tap on a puzzle solution to unlock the puzzle. Level based puzzles - The game gives you 10 clues to follow and in order to unlock puzzles. Cave: 13. Open Concept: 16. Remote: 17. 4-Star Stronghold: 1.2. Five Card House: 3. Our World: 4. The Town: 1. Mermaid's House: 7. Altar: 1.

Inspired by classic point & click adventure games like The Secret of Monkey Island, Day of the Tentacle and Monkey Island 2: LeChuck's Revenge, R.U. Games brings you the definitive steampunk adaptation of Ludum Dare #32. The story is simple, even if it seems a bit long. The only way to get out of the dark dungeon is to reveal the secrets of the sorceress. Littered around this gloomy dungeon are special caskets, each with a key-like object, which can unlock a secret doorway in the floor. As you progress in solving the riddles, you will discover more and more In this sandbox style game, there are no events such as saving or loading. Only the state of the game is saved at the end of a run and loaded when you continue. There are: - 33 interactive tiles that offer up to 4 animations at a time - 17 animated tiles - 8 tilesets - 3 emotes - 12 endings - 12 saving positions (save before each torture, or when you encounter a cat) - 3 unique challenges - Powerful traps and nasty monsters - 30 animated sounds The scenario is completely scripted but for the people who don't know, a game is where you get to do things to people and/or explore the environment. Then you get to react to what happens. A great way to discover this pack and to practice the action script commands is to try the demo version, which includes an intro text, audio track and a few tutorials. The demo takes 10 minutes to complete. Play the demo and then download the full version to try it out for yourself! * Important note: * R.U.
