★ Alarm clock ★ Multiple alarms ★ Snooze ★ Snooze by time ★ Snooze by time and current alarm ★ Notification when snoozed ★ Bright screen ★ Two alarms can be snoozed for the same message ★ DVR ★ Snooze on one screen and set alarm on another ★ Set multiple snooze reminders ★ Set Snooze reminder by date or time ★ Set Snooze reminder by time and current alarm ★ Snooze reminder by date ★ Snooze reminder by time ★ Custom list of reminders ★ Email reminders ★ Events calendar System Requirements: Microsoft.NET Framework Microsoft.NET Framework 4.0 Appy Alarm Assistant is a small lightweight portable app for managing recurring alarms in your Windows Phone 7 device. It will allow you to save a record of recurring events, use them at any time, and add new one on the fly. Your calendar entry will be automatically updated once the app finds a new recurring alarm. You can customize or repair event names, or delete them. The app can also handle all types of alarms, such as hourly, daily, weekly, monthly, yearly, etc. Supported languages We have added support for a user selected language since we are a global product. Additional languages will be added as they are requested. Do you want to enhance your app? We provide a way to subscribe to our newsletter to receive occasional promotional offers or updates on when new versions of your app are available. You can unsubscribe from this at any time. Download this free sample! Download the free sample Appy Alarm Assistant for Windows Phone 7 to try out its complete features. 1. Add recurring events 2. Manage events 3. Clean up old events 4. Update due date of events 5. Delete events 6. Snooze What's New: This update is very significant, in fact we are not sure if we should call it an update or a whole new version. We have added support for recurring alarms which means that your event can be repeated on a regular basis automatically. The weekly/monthly recurrence type is only available for recurring events. Some bugs were fixed. Changes: Version 1.1 is now available. Snooze Alarms is an easy to use application that allows you to setup, edit and delete alarm clocks, reminders, schedules and events right b7e8fdf5c8

You might not know all the colors in the rainbow but you can definitely tell the difference between a home and a business office. A poorly lit home is one that is difficult to move around in – perfect for fire hazards! A brightly lit office space is a great spot for a meeting, study or brainstorming session! The WP-Reader is a small, quick and simple way to quickly find the perfect images for a new project, a unique way to keep track of what you need to focus on and what important deadlines are approaching. How to set up WP-Reader 1. First you'll have to install the WP-Reader application. Once installed simply login to the WP-Reader application and load your account. 2. Next step is to create your individual account. You'll need to create an account for each person that will be using the WP-Reader and they will need to login with the same account. Each individual must have their own profile. 3. Once your individual profile is set up it is time to choose the images you want to be able to save. 4. After selecting the images you want to be in the system you will be directed to a profile update page where you can make your selections on the image. 5. Once your selected images are set up it is then time to save your profile. When a profile has been saved it is time to save a new profile if you wish to add more images to your collection. You can add or remove images from your account at any time. 6. When all your profiles are ready to go you can then make your "Home" profile. WP-Reader Features: Image Wall Images Every month photos of images with titles that can all be grouped by a common theme to make it easier to find are added to the system. Image Titles Create a descriptive title for the image you would like to store or save. Image Notes You can use notes to store important information about the image. Image Captions Adding your own image captions is an easy process. Individual Accounts Each individual user can personalize their own profile by selecting the images they want to save. Smart Folder Provides quick and easy access to all your photos. Advanced Search Search by date, image name, tags, caption and more. Wireless Upload Easily upload images

#### What's New In?

An extremely simple and user friendly alarm clock, with two main functions, and quite flexible in usage. Create recurring alarms: You can configure multiple alarms: one for each hour, and one for each day. Creating new alarms: A simple alarm clock with no gimmicks, and very intuitive controls. User interface: The user interface is simple and easy to use, with very intuitive controls. The Alarm is scheduled to go off: If you want to see the clock go off for the first time you need to open the Alarm Clock window, and press the "Create new alarm" button. Note: The Alarm can be opened more than once, but only one alarm can be created per session. If you do not want a new alarm to be created do not press the "Create new alarm" button and the current alarm will go off. To cancel the current alarm and create a new one press the "Cancel current alarm" button. Existing Alarms can be canceled: Press the "Cancel current alarm" button. You will not be able to create a new alarm until the current alarm has been canceled. Automatically get out of the game if you press the Esc key: Press the "Disable the alarm clock" button. This program is a free trial. You can check for its download here.
