Two beta-blockers, propranolol and timolol, were administered to 10 healthy volunteers according to double-blind crossover design to evaluate any effects on ECG parameters. Both drugs induced a significant decrease of the mean QT interval duration and amplitude of the T wave. After timolol, QTc, and QTc dispersion were statistically significantly higher compared with baseline values. Propranolol increased QTc dispersion only slightly, but significantly. Both drugs decreased the heart rate and left ventricular systolic and diastolic pressure. This study shows that QT interval and T-wave amplitude are affected by clinical doses of beta-blockers.Elderly diabetic patients are not high risk for non-traumatic lower limb amputation after 9 years of follow-up. Q: Why was the ring exchange question not still open? This question was posted on Software Engineering Meta yesterday and clearly shows that the question is not deleted since as per the moderator comments and answers, the question was closed as a duplicate of another question on SO. I think that this is not a duplicate. The question is about Ruby and the answers and comments are highly useful to the newbie who is using Ruby and has an 'Rails' error (someone tried to install a gem on Windows and got that error). Why was this question closed as a duplicate? A: This is a duplicate and has been closed as such. The difference you describe seems to be irrelevant to the SO question you linked. See the duplicates I posted on a similar question that was answered in a more appropriate way than the duplicated question: What do I do if gem install fails? As for why, OP is not displaying an issue in their question. It has no code in it. While it may have come from the same error in ruby, it is probably not the same question. JUPITER, Fla. — For the first time since 2013, the Tampa Bay Rays have hope of the post-season. They are sitting on the back edge of the AL Wild Card spot, but haven't won a game since they dealt with some drama involving one of their own. In a highly anticipated rematch of Game 1 on Wednesday, the Rays scraped out a win over Oakland, relying on a game-changing performance from 10-game winner Blake Snell. The hard-luck Rays took the second of three wins, and now sit a game behind the Yankees, who beat the Twins Tuesday in a game that no one expected at all. The Rays had serious trouble with Ichiro Suzuki's game-winning hit in Game 1 and were right there, only to have Kris Bryant lose a routine popup in the 10th inning. It was a dramatic end to what had been a drama-filled second half of the season for the Rays. More importantly, though, it's about to get fun. The Rays sit two games back with two games to play against the Yankees, a team many felt they should be facing in the AL Wild Card round. Instead, the Rays will face the Red Sox, who sit just one back with two to go. "We put ourselves in a position to be in this
