I don't know how to store variable... Can any help me. A: Answer: You can store variable into your code like this: `for(i=0;i<$result['se_name']; )` And print it back like this: `print $output;` Here is your complete example: `'.$result['se_name'].'; } print $output; ?>` Friday, January 1, 2013 Getting Organized I spent the last few weeks attending several workshops and classes designed to help me get organized. I am amazed at how productive I am when I am well organized. I feel like I had a big ball of yarn that I could not quite keep track of, and so I went in search of someone who could help me sort it. I am so glad I found my friend, Julia. She is in business as a professional organizer. She helped me keep my mess in order so I could be more efficient. We shopped together and we worked in my home for 4 weeks. It made a huge difference to my life to get my home organized and to enjoy my family and have an organized home so I can enjoy my children and friends again. This morning, I was blessed with another organization class. I took an online class at home on how to work with our children. I took the class because I want to be the best mom I can be. I want to know more about how to best help my children and how to be the best influence in their lives. I want to know what tricks other moms and dads have figured out that work for them. I want to know more about how to help my children to overcome life's challenges. I want to be

LATEST PROJECT KUALA LUMPUR : 7GB "5Gb Project" achtung mein land pick a state from the map (1 state) and vote for it and the project will develop that state for the duration of the project, whether you like it or not. candidate # 2,571. meko (1/9) 4 10. up vote 0 down vote favorite. Sep 05 04:16 UTC. CANDIDATES DO NOT NEED TO RE-VOTE. 2K Arr NEW PROJECT INFORMATION Johor: 1. NEW CANDIDATE: 5K PENANG : 2. Bioinformatics and whole genome sequencing. The ability to sequence the human genome has had a revolutionary impact on molecular and human genetics. In the last few years the sequencing of many bacterial genomes and the emerging technologies have been used to provide insights into bacterial evolution and pathogenicity. A major goal in human genetics is the understanding of how genetic variation generates phenotypic variation and disease, and the recent ability to sequence an individual's entire genome has been invaluable for achieving this. The main goal of this review is to focus on the information gained from whole genome sequencing and discuss the lessons learnt from this and the possible applications in medicine. The advent of whole genome sequencing is the beginning of a new era in biomedical research and medicine that will have a significant impact on many fields, including human genetics and molecular medicine. Renal activity during different kinds of therapeutic hypothermia. Management of cardiac arrest patients requires fast-start interventions, including treatment with a mild therapeutic hypothermia, to reduce postresuscitation myocardial injury. However, it is not clear whether the treatment with therapeutic hypothermia can improve postresuscitation outcomes by reducing renal dysfunction, which is a common postresuscitation phenomenon. We evaluated the renal activity during treatment with therapeutic hypothermia and the interplay between renal activity and neurological outcomes in postresuscitation cardiac arrest patients. Consecutive adult postresuscitation cardiac arrest patients who received therapeutic hypothermia between September 2015 and March 2018 were retrospectively reviewed. Glomerular filtration rate (GFR) was measured with a radiolabelled meal. Preceding the therapeutic hypothermia, the GFR was  $27.5 \pm 3.2$  mL/min/1.73 m<sup>2</sup>. The GFR decreased to  $26.3 \pm 2.5$  ( 0cc13bf012

The pulse of India has changed. It has undergone a sea change with Modi's rise to power and almost a decade of economic reform. The rise of the super powers of China, USA and Europe and with the more recent rise of Brazil, Mexico and South Africa also means India has grown in influence. It is now a natural "swing state", says Raghu Raman, a founder of E&E (Energy & Environment) Global, a research firm covering energy trends around the world. The print club has hit its eight-year anniversary. I'm interviewing Krish Chintal, the owner of the website and the club's founder, to find out more about the club and its development. The Descartes E Ink technology has become very popular and is used in many devices, particularly devices used for reading books. The prices are lower than before, so more companies could get into this technology. Some of these companies include Amazon, Apple and Epson. For about two decades, software development has been dominated by the use of static typing. However, recent decades have seen a move towards dynamic typing, where the syntax is all-permissive. With a focus on automatic programming and, in particular, on automating the verification of source code, the typesafety of dynamic programs are no longer a major concern. "While similar budget offers exist elsewhere, specifically in China, India is the only country in the world where inexpensive PCs have become ubiquitous", says Raghu Raman, CEO of E&E Global, which publishes "Stats on Energy and Environment: India", a worldwide annual survey of energy markets. India's entry in this race has a strong value proposition in the form of 150 high-end smartphones and, to a lesser extent, laptops, which will sell for Rs 2,000-3,000. India sold more than 5.5 million smartphones in the March quarter of 2015, a 15 percent increase over the previous quarter, according to data from IDC, a market-research firm. India was the world's second-largest market for smartphone shipments in 2013, after China, and has been growing at a compound annual growth rate of 33 percent since 2008, IDC said. Bangladesh has launched its first ever climate action plan in an effort to meet its goals under the Paris Climate Agreement. The new
