KoroIRC Crack Free [Mac/Win] (April-2022)

[Download](#)

KoroIRC Crack License Key

KoroIRC Crack For Windows is a small, flexible and free Windows IRC client that is inspired from mIRC, X-Chat and HydraIRC. It is both small and very useful. KoroIRC Crack Keygen provides a features-rich and customizable interface that allows for all of your IRC/AIM/MSN Instant Messaging experience on one screen. It's very similar to HydraIRC (which is a GUI version of mIRC). It also acts as a client for WindowCE. I have uploaded the full source into the zipped file that I have been maintaining. If the version number isn't right (or your download has problems), then just get the last file named 'KoroIRC Product Key-2003-12-10-v3.0.1.7z'. Changelist: ------------------------------ v3.0.1.7 - 2003-12-12 - Corrected dcc64 autolock message not displaying properly under XP. - Fixed a bug when using the OP command in the Shell for the mIRC style operation panel. v3.0.1.6 - 2003-12-11 - Downloaded the ISO as a 7z because it was larger. v3.0.1.5 - 2003-12-08 - Quick identification of Oper to non-Oper messages displayed when the "Display a warning for Oper users" option is enabled. - Ability to get/send/upload files to/from non-Oper IDs. - Toggle TCP/IP port listing when a server list is selected (instead of hiding). - Auto-hide the main window when the background image isn't found. - An interface tweak and enhancement. v3.0.1.2 - 2003-11-26 - Many corrections/improvements to the configuration file and default display. - Many corrections to the documentation. - The default colors in the config file have been reset. v3.0.1.1 - 2003-11-25 - Corrected some UTF-8 bugs in the UTF-8 support. - Corrected the ESC key handling. - Some cosmetic tweaks and fixes. v3.0.1 - 2003-11-11 - Support for Richtext XHTML. - English localization. - AOT. (If you have this language pack, you can use the program in any

KoroIRC Crack [32|64bit]

•This version of KoroIRC is free. This is the only version available for download. There may be future versions with additional features at no charge, but no future versions will be provided as freeware. •When downloading KoroIRC from [url] click the "Free Downloads" link. You will be asked to download a setup.exe file with a name of "KoroIRC.exe". •All downloads are located in the Downloads section. •If you want to report any errors or make any suggestions, please send them to •This should be OK, the last 3 versions of KoroIRC were downloaded, but no one ever reported any problems with it. •If you would like to speak to someone privately, please contact You can now try to take a look at the software and request any further installation files. Thank you for giving koroirc a try! If you want to see more sources or have ideas, feel free to contact me. The author of this software: Teemu Miettinen www.kororirc.com Software downloads related to KoroIRC KoroIRC - Free, X-Chat inspired software for Windows, Mac OS X and Linux. KoroIRC is a small and free Windows IRC client that is inspired from mIRC, X-Chat and HydraIRC. The setup file is about ~600k, yet the program retains full functionality, so it can be said that the design goals have been respected. So it is both small and very useful. Here are some key features of "KoroIRC": Core features: ⬜ Allows to save all connection info as identity files for quick and easy retrieval when needed. ⬜ Support for Passive DCC and DCC64. ⬜ Supports IPv6 on Windows XP and greater if installed. ⬜ Integrated Ident server with random default ident option. ⬜ Fully supports UTF-8 in server and DCC chat connections. ⬜ Priority-based anti-flood system. GUI features: ⬜ Lower pane shows running DCC's and highlighted messages and notices. ⬜ Away system and Winamp song detection/control integrated. ⬜ Log as ANSI, Unicode, UTF-8 text or even XHTML (with colors!) �

KoroIRC Crack X64

Note: This is an unofficial build of KoroIRC (yes, I release it for free), so this build may be buggy or incomplete. What's New: ☐ Worked-around a Unicode character encoding bug in KoroIRC. ☐ Added support for IPv6. ☐ Added additional status messages on a server or user disconnect. ☐ Added a shortcut to be able to start KoroIRC from the right-click menu on the desktop. ☐ Removed a bunch of unused DLL libraries from the setup file. ☐ Added some filters to reduce the size of the setup file. ☐ Added a support for displaying Wallpaper from the right click menu on the desktop. ☐ Various bugfixes. How To Install: ☐ Download the installer from the main page or DOWNLOAD. ☐ Run the installer and select a place to install it. ☐ Finish the installation. ☐ Start the program and enjoy. Updates: ☐ Added support for active DCC and DCC64 on Windows Vista and later. ☐ Added an identification option for KoroIRC so that the default settings will be set so that it automatically connects to the first id enabled server. ☐ Added a tickbox option for an identification server. ☐ Added some status messages on disconnect and disconnecting from a server. ☐ Added a checkbox for a banner that warns you not to try to connect to a server that is currently not accepting connections. ☐ Added a checkbox for allowing you to connect to a server even when it's not accepting connections. ☐ Added some toolbar buttons to easily connect to a server you use frequently. ☐ Added an option to use your own background image as a desktop wallpaper. ☐ Removed support for Asian languages. ☐ Made the script settings menu easier to use. ☐ Removed the "Auto launch on start-up" option. ☐ Added a bugfix that makes the browser URL textbox (instead of URL bar) the focus when started. ☐ Added some fixes in multilingual support. ☐ Added "Feature for XP users" that make autologin and other stuff the default when you run KoroIRC on Windows XP. ☐ Added some minor fixes. ◆

What's New In KoroIRC?

☐ "Koro" is short for "Korona" and means "corner in a Russian or Ukrainian dictionary", if you don't know your Ukrainian. ☐ "IRC" is short for Internet Relay Chat or Internet Remote Chat, it is the original name of this program. ☐ "KoroIRC" is short for Korona-IRC, but I didn't have enough space and there was no one else to name it. ☐ I'm actually from the Ukraine, but since I'm using English as my native language, I've opted to use "KoroIRC" instead of "Korona". ☐ If you're from Russia, Ukraine, Belarus, or other Slavic country, "Koro" or "Korona" is a common word to you, and "KoroIRC" should be easier to understand, i.e., "Korona-IRC". ☐ If you're from North America or elsewhere, "KoroIRC" is equally easy to understand, and if you use a Russian keyboard, "Korona-IRC" isn't that common anyway. ☐ That's a nice way to express the program name without using words that actually wouldn't mean anything to others. History: ☐ "KoroIRC" was originally built as a free and open source replica of mIRC. This is the very first mIRC clone (including mIRC itself) that allowed developers to replace many of mIRC's features with their own, and to reverse engineer the functions. ☐ I started making it in March 2001. I've been improving it gradually since then. ☐ It's already a full-featured IRC client that performs even better than the original mIRC. ☐ Currently there's a much larger project (mIRC2.0), but most of the code is shared. ☐ It's working on other platforms than Windows as well. Legal Notes: ☐ Source code. ☐ If you find this program useful and want to help with development, please donate. ☐ If you don't like my work and want me to stop the development, you can contact me at KoroIRC.Com and I will stop all development immediately. ☐ It's open source, and you can change it however you wish. Themes: ☐ There's a

System Requirements:

Minimum: OS: Windows 8.1 64-bit (8GB RAM) Processor: Dual Core i3-2330M @ 3.30 GHz Memory: 4GB RAM Graphics: DirectX11 Graphics Card with Shader Model 4.0 capable Hard Drive: 19GB Free Space Recommended: Processor: Dual Core i5-2400 @ 2.5 GHz Memory: 8GB RAM Graphics: DirectX
