### What's new in Fantasy Grounds - Hellfrost: Heart Of Winter (Savage Worlds):

is a little like jumping off the end of the world and into the queue of the Free State. Everything starts off well enough - a bottle of chilled Moskovskaya, an unused table, a movie playing on the projector. But when the weather turns bad, when the taxis take hours to arrive and when you're rudely awakened to the reality of usury and opulence, you soon discover that the city's lure is those final few hours of the day, when it seems possible that the last bus will never arrive and when the light outside is so beautiful you envy those who can smell it in the morning. Before you depart, you might as well slip a bracelet back to the girl at reception, rather than risking the chance that she might forget to give it back to you. You'll probably be grateful at the end of your trip - you'll have something on your wrist that you bought with no ulterior motive in mind. The next time you'll walk past GUM department store, the showcase for high-class designers, with its marble columns and mirrored walls, you might just give in to a little nostalgia and find yourself gazing at the sparkling silver bracelet you strapped on your wrist, with a silly smile on your face. Moscow does the same thing to you - there is something about this city that renders your brain numb; something that lets you forget for at least a while, that lets you become a child again. The city is so unusual - so certainly at odds with the naïve image of Russia depicted on TV, or even in the movies. It isn't what anyone seems to be expecting. There are Russian ballets and there is a metro; there are red flags and borscht and Pinocchio; and there is Old Woman Waiter and Hotel Katya. It is the town of millions, which is actually a city of millions that somehow forgets that a glass of vodka needs to be raised, holds its breath and waits for an endlessly long 20 minutes to catch its drift. One could say that Moscow is a city that refuses to grow up, or transform itself, or reduce itself to the role of nothing more than a headquarters for national-security agencies, diplomatic delegations and the Army Man. But that, of course, would be projecting our own taste for stagnation on to a city that is just like any other big capital city. Moscow will drive you crazy, but it won't reduce you to a child for that

At least three states had severe flooding that was causing problems with transportation and getting out of the way of the worst of the rains. In Kentucky, the flooding has affected more than 2,000 homes. At least eight people were injured in floods in Kentucky, while hundreds of roads and bridges were flooded and a weather station was washed away. This photo provided by the Ohio River Valley Rebuilders shows the devastation from the floods in Campbell, Ky., Tuesday, July 9, 2014. As the ice melts in the arctic, parts of the Midwest and Rocky Mountains face their biggest floods in more than a decade. The National Weather Service says it is too early to tell whether California is in danger of being hit by a flood threat that is expected to rise from today's low-level rains. (AP Photo/Ohio River Valley Rebuilders) Cities and towns in Kentucky were hit hard by floods and power outages, including some heavily flooded areas in the Cumberland River Basin.
