Limbesoul & Luluize - Trenchtown. FREE! 4 Deep House Bass Guitar Samples & Loops from. Soul/House Vocals Loops/Samples - 703 MB. Seduction Synths & House Piano Vocal by Class A. Jeremy Smith: Find which tool has the last build We use a c# ASP.NET application for building our website. It's working fine. I have a clean server and I'm currently on version 132 (Build date - 18/07/2010). In order to check which version of the application I used the Application_PreRequestHandlerExecute method which is being executed before the request is sent to the server (using the Global.asax). However I'm not sure how to get the last version I used. Is there a way to get that info? We use TeamCity, and it's possible to send build reports to it. A: Maybe you could use the /ApplicationEnd event in Global.asax.cs protected void Application_End(object sender, EventArgs e) { BuildNumber = Application["BuildNumber"]; } And I would like to say a word about Application state. If you want the most up to date information use the HttpContext.Current.Application object and not the Global.asax.cs static Application object. Hope I could help, if you have any questions, please leave a comment Q: Getting ORA-00604 syntax error when executing sql statement I'm getting the "ORA-00604 syntax error" when executing a simple SQL statement from a PL/SQL block. The statement is: select 'hello world'||TO_CHAR(SYSDATE, 'DD-MON-YYYY') from DUAL; My proc looks like this: create or replace PROCEDURE test() AS a NUMBER := 5; BEGIN select 'hello world'||TO_CHAR(SYSDATE, 'DD-MON-YYYY'
