

download rar ex machina subtitles english 1080p video download ex machina subtitles english 1080p video download ex machina english subtitles 1080p video download ex machina english subtitles 1080p video . Movies & TV - Ex Machina A young programmer with an extraordinary talent, Alec (Domhnall Gleeson) is shown a series of potential. The present invention pertains generally to the field of integrated circuits. More particularly, the present invention pertains to a backside illuminated imaging pixel having a buried diffusion region for improved signal-to-noise ratio. In a backside illuminated imager, light emitted from a light source is focused on the light receiving side of the imaging sensor. As a consequence, both the light receiving area of the imaging sensor and the light path from the light source to the light receiving side of the imaging sensor are minimized. This advantageously results in a low light loss, low cross talk, and lower manufacturing cost than other types of imager. FIGS. 1A-1C illustrate an existing backside illuminated imager. FIG. 1A is a cross-sectional view of an imaging pixel 100. FIG. 1B illustrates a cross-section of a portion 102 of the imaging pixel 100. The imaging pixel 100 includes a substrate 101, a support pad 103 formed on the substrate 101, and a light blocking layer 105 formed on the support pad 103. The support pad 103 has a light reflecting surface 104 on which a metal contact layer 102 is formed. A color filter 107 is formed on the light reflecting surface 104. The light blocking layer 105 is formed above the light reflecting surface 104 and under the color filter 107. The light blocking layer 105 has a white diffuser region 106. A hole 108 is provided in the light blocking layer 105. Light emitted from a light source (not shown) passes through the hole 108 and is then reflected by the light reflecting surface 104 toward the imaging pixel 100. Due to the characteristics of the diffuser region 106, the uniformity of intensity of light incident on the light receiving side of the imaging pixel 100 is improved. The imaging pixel 100 further includes a metal pad 109 formed on the substrate 101, a metal wire 110 formed on the metal pad 109, and a metal contact layer 111 formed on the metal wire 110. The metal contact layer 111 is electrically connected to the metal wire 110 and the color filter 107. An aluminum silicide layer 116 is formed on top of the metal contact layer 111 and the color filter 107.
