We will not share it with your...[Comparative evaluation of clinical and urodynamic findings of unstable bladder before and after treatment]. To improve the efficacy of treatment of men with unstable bladder, it is necessary to have the urodynamic information about the

condition of the detrusor muscle. The article presents the results of urodynamic and clinical studies in patients with unstable bladder treated in 2002-2006. Results of the comparative analysis of urodynamic and clinical data of patients before and after treatment of vesicoureteral reflux with pyeloplasty were presented. In patients with vesicoureteral reflux treated with pyeloplasty there was the significant change of the parameters of the detrusor function in the course of treatment (in particular, the increase of the resting pressure in the proximal part of the bladder, the increase of the volume of contraction in the period of voiding bladder, the 6d1f23a050
