Mythica: The Godslayer â∏∏ KODI â∏∏.Sunday, April 23, 2010 You are reading the Blog of a Serial Entrepreneur that has started 4 successful Internet businesses from scratch. In my former companies, we used a stack that varied for each project. Sometimes the stack was Perl, sometimes Python, sometimes Java, sometimes PHP and sometimes C++. I wanted to share my stack with the rest of the world, so I set a template in Grails. The stack is: Grails SQLAlchemy jQuery Grails is the engine SQLAIchemy is a ORM that allows you to do all of your SQL inside your groovy classes. jQuery is a JavaScript library that allows you to write web apps like you would in the good old days of HTML. Grails is a rapid web development environment that allows you to use the right language for the right job. This "stack" is my favorite stack because it allows me to build large-scale applications really fast. I have successfully built applications that are 32 million lines of code. With this stack, I can use all of my development skills to create web applications that are large-scale and maintainable.Q: How to make this jQuery code reusable I have written this code to select a text from input field, delete

it and replace it with a image. However I cant make it reusable. \$(function () { \$("#txtClosed").change(function () { var text = \$(this).val(); 6d1f23a050
