Cropped to 1 × 1 pixel.Q: What is the alternative for LIKE in PostgreSQL I have a table with Title & Description field. I need to search this table using title or description and I have used LIKE "%query%" in SQLite but i don't know how to do that in PostgreSQL. A: You can use ~ in PostgreSQL instead of LIKE. ~ is the PostgreSQL's regular expression syntax. See the docs A: If the filter value is a string, use ~: SELECT \* FROM tablename WHERE column LIKE '%filtervalue%'; If the value is a number, use the ~ operator to do the same thing. ~ - Matches if the content of any element of the string is a member of the list of items: A string that has no members is considered to match when a null string of the same length as the string is considered to be a member of the string (this is the default).
