Â° image from motion design schoolEurope AT A GLANCE: Europe is a leader in the global security technology market. The key trends in this region include the enhanced protection provided by external and internal motion and control, increasing importance of IoT, and increasing security funding. The EU region is classified as an emerging market, which means there is significant potential growth in the coming years. There are 13.6 million security and fire protection systems installed in the EU, and the market is projected to hit 16.6 million by 2024. Cisco predicts there will be a 69 percent increase in IT spending between 2015 and 2022. Much of this spending will go into cybersecurity, making the European region a vital component in the overall cybersecurity market.
