. A previous version of this article incorrectly stated that the "new witnesses" in the Mueller report was a claim about social media relationships with Russians. Instead, the references were to former Trump staffers with connections to Russia. â. Of the numerous controversies faced by the Trump administration, the subject of Trump's conflicts of interest since the beginning of his term has been the most challenging.Percutaneous nephrolithotomy in a patient with multiple renal calculi and obstructive uropathy. We present a case of percutaneous nephrolithotomy (PCNL) in an obese and a hypertensive male patient with multiple renal calculi. The renal tract was chronically obstructive due to extrinsic compression in the pelvis caused by a large left proximal ureteral calculus. The patient had previously undergone open pyelolithotomy. Percutaneous access was obtained by placing a nephroscope under fluoroscopic guidance and a 16F flexible nephrostomy tube was placed. PCNL was then performed, using a 14F three-pronged puncture needle. The patient had a single mid-lower calyceal stone that was successfully removed through the nephrostomy tube. We conclude that PCNL should be considered in the management of renal calculi that are chronically obstructive, regardless of their location or number.Electrophoretic analysis of human papillomavirus-like DNA in urethral condylomas and carcinomas. Urethral lesions from 35 patients with proliferative condyloma acuminatum (PA), 18 patients with squamous cell carcinoma of the urethra (SCC), and ten patients with sexually transmitted disease (STD) were analyzed for the presence of viral and cellular oncogene or proto-oncogene markers, including human papillomavirus (HPV) types 6, 16 and 18, as well as polyoma, EBV, and SV40. Twenty of 30 (67%) PA lesions contained HPV 6 or 18 DNA, while no SCC or STD lesions contained HPV DNA. Positive staining with antibodies to the early antigen of HPV 6 and 18 was seen in five of the seven PA but not in any SCC or STD lesions. In addition, similar antibodies stained cells in the condylomatous epithelium with some cases containing a distinctive punctate pattern suggestive of HPV expression.Q: How to get JSON-like lists of values from SQLite

IVONA2VoiceJacekv16364bit I have no clue why this happens. I know it needs to use a different delimiter, but I don't know what to use. My snippet of code is below. Sub ParseAll(ByVal HTML As String) Dim FilePath As String Dim counter As Integer Dim txt As String Dim div As Object Dim tag As Object Dim mylist As Object Dim MyObj As Object Dim strFilePath As String FilePath = Application.ActiveWorkbook.Path & "\Export" counter = 1 Set mylist = CreateObject("System.Collections.ArrayList") 'Loop through each HTML string For Each strFilePath In Array(HTML) 'Check if the current HTML string contains array element If InStr(1, "strFilePath" & counter, "strFilePath", vbTextCompare) Then 'Get the current HTML string strFilePath = Split(HTML, "strFilePath" & counter, 1)(0) 'Get the current table row Set tag = HTML.Find("table", 1) 'Add the current HTML string and the current table row to mylist mylist.Add strFilePath 'Get the current HTML string strFilePath = Split(HTML, "strFilePath" & counter, 1)(0) 'Get the current table row Set tag = HTML.Find("table", 1) 'Create an instance of System.Collections.ArrayList 6d1f23a050
