Download this toolkit and transfer it to the Office program you use. Microsoft Toolkit for Office 2014. To download the toolkit, go to the download page: How to Open Microsoft Office Toolkit Registration. After downloading the software tools, you must first activate them using an .Q: How to display the "last modified" of a file with shell script? I have a directory full of files, and I want to display the last modified date of each file, here's the script: `#!/bin/bash printf "%s " *.txt` But the result is: `ls -a *.txt` `ls: *.txt: No such file or directory` A: I expect the error you are getting is because the file does not exist. To resolve this just use a double wildcard: `ls *.txt` will work just fine. A rotary-wing aircraft such as a helicopter or fixed-wing aircraft includes a main rotor that is powered by a main rotor drive engine. During flight, the main rotor drive engine drives the main rotor and produces torque. Torque produced by the main rotor drive engine is transmitted from the main rotor through a drive shaft coupled to the main rotor to drive one or more accessories of the aircraft. For example, the torque may be used to drive a helicopter accessory drive assembly. The drive shaft also drives the main rotor drive engine. The rotor drive engine powers the main rotor and the drive shaft extends to the main rotor drive assembly, which is disposed on the outboard end of the rotor mast or hub. The rotor drive assembly includes a main gearbox that is c6a93da74d
