
East West Quantum Leap EWQL Symphonic Choirs Voices Of Passion-torrent.torrent HOT!

Imagine typing words into your computer, in any language, and hearing a world class Symphonic Choir sing those words in any key(s) you play live on your keyboard controller!

Well imagine no more, that's exactly what this revolutionary award-winning virtual instrument does. In addition, the Platinum edition (Gold edition has one mic position and is 16-bit) is the first 24-bit Choir virtual instrument to include three simultaneous stereo mic setups (close, stage and hall), so users can mix any combination of mic positions to control ambience. The Choirs were recorded in the same concert hall, by the same team as the EastWest Symphonic Orchestra and blend perfectly with EWQLSO. New sounds from EW QUANTUM LEAP and EASTWEST titles (EW/QL Symphonic Orchestra, EW Steinway B Piano, QL Stormdrum, QL Guitar and Bass, QL 56 Strat, QL Hardcore Bass, QL RA, QL Brass, QL Voices of the Apocalypse) all newly programmed with superior sound quality. After opening the Z application, COLOSSUS has a few additional buttons on its front panel. These buttons enable the user to automate COLOSSUS to do some complex tasks and tasks relating to the quality of the output. - The ability to type words and phrases into software and have your computer sing them back to you is nothing new, but never ceases to deliver wonderment. EastWest first brought this technology to us some years ago, with the impressive Symphonic Choirs, however back then the operational side of getting this to work was a little clunky, with further streamlining and development assured. Sure enough, some years later, the technology has come of age, in no small part due to enhancements in EastWest's own software plug-in.
