The Recording Industry Association of America has sued Google and YouTube for alleged copyright infringement, seeking an order that would block the two companies from hosting the media. The allegation is that Google and YouTube were "facilitating" copyright infringement and profiting from doing so, but the court has rejected Google's request for a preliminary injunction. Google is appealing the decision, according to the AP. The RIAA is seeking about \$150,000 per song. LeBron James announced his decision to join the Los Angeles Lakers with a lengthy statement on his website before LeBron James became a member of the Los Angeles Lakers, his first team in the NBA. With the announcement, LeBron James became a member of the Lakers, making him their third-youngest player and their youngest guard. The five-time ATP Finals champion has won 32 singles titles, most notably coming out on top when he retained his Wimbledon crown in 2012 with a tiebreak victory over the Scot. Following Wimbledon, he went on a mixed bag of tournaments until the Australian Open, where he was again agonizingly close to the world No 1 position, losing out to Djokovic in straight sets. He made the final of the US Open, was defeated by Djokovic in Cincinnati and reached the finals at the Australian Open, again getting upended by the Serb in four sets. This year, despite being hampered by a left ankle injury, he was able to reach the semi-finals in both Indian Wells and Miami, losing in straight sets against the No 1 players in the world,

Djokovic and Federer. But at the French Open, Murray again struggled in the semi-finals, going down to a surprise semi-final loss to the Czech Republic's Lukas Rosol. A nice business arrangement.

In an effort to protect his son, Bill insisted that he stay away from the media and never talk about the near-death experience. But as the campaign wound down, Jimmy did do a little bit of talking. He called reporters and said, Im going to talk. Christopher Tin is a two-time Grammy-winning composer of concert and media music. Time Magazine calls his music 'rousing' and 'anthemic', while The Guardian calls it 'joyful' and 'an intelligent meeting of melody and theme'. His output is strikingly diverse: ranging from lush symphonic works, to world-music infused choral anthems, to electro-acoustic film and video game scores. From *Waiting For The Man*, his gripping orchestral drama that was inspired by Tchaikovsky's 1890 ballet, to his orchestral-electro collaborative work with RZA, *Down To Earth*, to his most recent effort, *Red Beans*, his newest composition is filled with emotional intensity and breath-taking musical passages, rich with orchestration and cinematic instrumentation. Time Magazine called his music 'joyful' and 'an intelligent meeting of melody and theme', while The Guardian called it 'an intelligent meeting of melody and theme.'

Allan Surowiec is a jazz pianist, composer and arranger. He is also the director of the Jazz Studies program at Northern Illinois University, and author of the award-winning book ' *Abhangs* ', a study of the five different Indian jazz forms from which the present work has been composed. A pioneer of Western music and jazz, he is also the youngest jazz composer to receive a French Grand Prix de jazz from the Société des Auteurs, Compositeurs et Etonnants Professionnels (SAECP). He has been honored with the prestigious Django Jazz Prize from the Down Beat International Jazz Critics Poll, and in 2017 received a Lifetime

Achievement Award from the Worldfest in Houston. All of his music is published by Faxandu Music."] }], "network_id": 1, "network_name": "Ella", "page_title": "The Book of Baba Yaga", "page_type": "inner_page", "pk": 1, "url": "/v2/media_players/README" } Probing structural changes of myelinated axon by a close-up Q-switched laser system operating at a picosecond pulse width. The subcellular distribution of myelin sheath in peripheral nerves was investigated by a close-up Q-switched (CQS) laser with a pulse width of approximately 200 ps by a microscopic method. The absorbance of laser light was measured by a photodetector system which had a light-scattering wall. An unsteady phase on the detected signal was recorded for the first time, implying the diffusion of myelin sheath and detection for any distance of axons in the cross-section of the nerve. A method of comparative analysis of the absorbance changes with and without a myelin sheath was performed on electron-dense nerve samples by using a computer-controlled step motor which gave a continuous sample feed.

A. Field of the Invention The present invention relates to an apparatus and method for automatically tracking and measuring the speed of a vehicle by means of an axle counter which is electronically controlled by a microcomputer. More particularly, the present invention relates to an apparatus and method for measuring the rotational speed and axial position of a vehicle wheel by activating a load cell by means of a pulse-width modulated (PWM) signal, which signal is generated by a generator driven by a rotary encoder of the wheel. B. Description of the Prior Art Electronically controlled axle counters are known, which take up a considerable amount of space and are relatively expensive. It is also known to combine mechanical axle counters with electronic apparatus which measures the speed of a vehicle by means of a voltage proportional to the rotational speed of the axle whose rotary encoder is connected to the electronic apparatus. One such apparatus utilizes an electric motor driven by a generator, whose constant-speed is indirectly controlled by a rotary transducer, which outputs a direct voltage proportional to the rotational speed

of the motor's drive shaft. The apparatus disclosed in U.S. Pat. No. 4,489,928, which is hereby incorporated by reference, utilizes a load cell which activates a pulse-width modulated (PWM) signal which in turn is supplied to a microcomputer in order to activate the motor, which is in turn inversely proportional to the speed of the vehicle. 5ec8ef588b
