The movie may not be as new or a departure from the previous film as the trailers promise, but there are many new aspects of Transformers lore revealed. The biggest surprise of all may be that even though this is a "live-action" movie, it's animated. It could be a sign that Hasbro has given up on the franchise. If so, that's a pity. This is a movie with more than enough explosions, fatalities, robot fights, Autobot crashes, and ridiculous humor for fans of the recent live-action movies, but it can't compare to the sheer fun of these original cartoons. It may be smart to enjoy it for what it is, but it's also worth taking a few minutes to appreciate what its creators have done. Now, let's get back to The Last Knight, which is basically a giant CGI explosion fest. It actually tries hard to make sense, following the theory that humans can communicate with the aliens, thus giving them the ability to use their technology, but it doesn't make much sense. Much is made of how the Transformers can communicate and have a society all their own, despite not being "organic." A scientist makes a note that they have used the term "animal" to describe how they work. The Transformers are animals, but they're not just animals, they're aliens from other universes as well. Straight away you know that the Transformers franchise is in trouble. No really. No seriously. The wall of spider web sound effects alone says it all. While I'm not sure what's going to happen in the world of Transformers when The Last Knight comes out, it's obvious that this is the end for the series.
