the game features an automatic tuning system and the customization of all the cars from the beginning of the game. by the way, the game is an absolute pleasure to play with a very intuitive control system. the only thing missing is the drag racing mode of the game. the graphics in this game are not distinguished by a special performance, but there is still something to see. also, you will be pleasing and have music in the game that will further entice you. the game has an automatic vote. features: * new game mode, xds, designed to help practice tandem drifting. * visual auto tuning * improved performance tuning * the most true to life racing on a mobile platform * club racing * single-player * its the next step in drift-racing simulators * drag racing to be honest, we are really excited and looking forward to this game, and we are confident that there will be a lot of fun to be had, even though we have never tried drifting before. we are looking forward to trying out our virtual skills in carx drift racing online to see how we can improve our skills in order to get a higher score in the future. we will keep you posted on our progress and let you know if we have some new information. as a drifting game, carx drift racing online is without doubt the best ive played on the xbox, and the feel of the cars is absolutely bang on. each needs a different technique to get the best out of it, whether it be taking a hachi roku and absolutely wringing its neck to get it to drift, valves bouncing off the bonnet, or whether it be the hornet, with a big lazy v8, utilising the torque to keep the drift going. it is fantastic fun, and the feeling when you manage to drift a whole track without the front wheels ever being in line with the rears is a fantastic feeling. i used to do this on autumn ring mini in a dodge viper in the first gran turismo, and the years in between havent dulled the sheer fun of drifting. 5ec8ef588b
