

## **My Arabic Teacher Mualimi 5 1 =LINK=**

Arabic, I'm so excited to be here! Will be online most of the week. Today we began by reading this fun. When I started learning Arabic, I didn't realize how much would help me with my own language skills. Now that I am a couple of years further, I know that the language is a great asset for my overall personal and professional development. If you're thinking about learning Arabic, I highly recommend you give it a try. You don't have to learn Arabic as a long-term goal, but I find that the extra motivation and skills that I've picked up have been very beneficial in all areas of my life. Learn Arabic Online. You can study in your own time, in the comfort of your own home. It's simple to sign up and start learning Arabic. This application is suitable for students of all levels. Learn Arabic with the world's most renowned online Arabic teachers who are native Arabic speakers, with 20 years of experience. Learn any Arabic language from beginner to advanced level. Learn Arabic from any computer or mobile device! You can start learning at your own pace. This application is suitable for students of all levels. Learn Arabic with the world's most renowned online Arabic teachers who are native Arabic speakers, with 20 years of experience. Learn any Arabic language from beginner to advanced level. We offer the most effective Arabic lessons in Modern Standard, Colloquial & Quranic Arabic. Sign up now!

Transgenic sweetpotato plants overexpressing leaf phosphoenolpyruvate carboxylase (PEPC) are resistant to cold and osmotic stress but have reduced photosynthesis. Phosphoenolpyruvate carboxylase (PEPC) is the key enzyme of C4 photosynthesis and primary CO2 fixation. Overexpression of PEPC in transgenic plants has been shown to increase plant resistance to abiotic stresses. The aim of this study was to examine the effects of PEPC overexpression on plant growth and water relations in transgenic sweetpotato plants (*Ipomoea batatas* (L.) Lam) under abiotic stress conditions. The transgenic plants overexpressing the PEPC gene were resistant to cold and drought stresses but had a lower photosynthetic rate than wild-type plants. The PEPC gene expression levels in transgenic plants were 8.3- and 4.5-fold higher than those in wild-type plants
