Parasitism is fundamental to ecosystem functioning. Moreover, the evolution of species involved in such interactions is therefore central to understanding and predicting ecosystem properties. Our understanding of the ecology of parasitism is rudimentary, but a growing body of theory suggests that the ecological success of parasites is unlikely to be evolutionary in nature. Here we show that

this theory of non-evolutionary adaptation in parasites is not supported by our analysis of parasite-host community dynamics over time. We show that, across a broad range of evolutionarily distinct species, parasites are generally highly abundant and maintain a positive rate of increase, suggesting that parasite ecology and evolution are shaped by processes of positive selection. Moreover, in contrast to the predictions of many theories of non- 2edc1e01e8

Spy Traffic Monitor is an easy-to-use tool that monitors and saves all your internet traffic. You can watch it in a browser to get real-time stats about bandwidth usage and see where your phone is wasting internet data or see if you're draining your data plan. You can download the app, too. It gives you total control over how much data you use, which apps you use the most, when you use the internet, and which websites you visit most. You can also make payments to your cellular provider to get more data or turn off your data connection for a period of time. Key features: Watch your internet traffic in real time Get detailed information about your internet usage View online traffic stats in a report Analyze your connection with other devices Display real-time usage of cellular and Wi-Fi Download apps Connect to websites Block out browsing for certain apps or days Add your carrier to receive phone calls for free or change your carrier settings Consult your roaming partner Use pre-paid cards View a breakdown of how much money you spend on apps Cortana is the intelligent personal assistant built into Windows 10 that helps you get things done more quickly by providing answers to your questions and even completing tasks for you. Cortana integrates with the Windows search experience, making it easier for you to find what you're looking for. Cortana helps you get to things faster by using your voice, text, and natural language. Simply ask Cortana what you want to do, and she'll instantly recognize what you said and get you exactly what you want. If you have any suggestions, or encounter any issues, please contact us at techsupport@appster.com. If you like Cortana, please give her a rating or star review in the Store. Please Note: Cortana is available in 37 languages with more languages coming soon. Yatse is a collection of helpful, intelligent solutions for your Android device. Smartphone users know exactly how much data they use. Yatse tracks data usage and warns users when they are approaching their data plan. Yatse does the calculations and shows users when it is time to make a plan. If users start to go over their data plan, Yatse even makes it easy to switch data carriers or services. Yatse is free to download and use. If you like Yatse, please give it a rating or star review in the Store. Never send another text or MMS again
