Adobe Systems Incorporated, the parent of Adobe, will release a technical preview of Photoshop CC 2019 (3D Release) to registered users of Photoshop CC on March 5, 2019. This will be followed by a beta release on April 2, 2019. Its main features will include:

- 3D Content Creation
- Adobe Sensei AI Augmented Reality
- Auto Detection Content
- Copy and Paste Content Between Surfaces
- Keep Your Photoshop Assets Open Source
- Local iOS Projects
- New UI Elements
- QR Codes
- Selection Improvements in Photoshop CC 2019 (3D)
- SiB (Share Images in One Box)

One of the best parts about the design process is collaborating with others to create stunning work. With Photoshop for iPad, that collaboration is now easier than ever. Local previews, Resize, Flip and Rotation make it easy to collaboratively edit and share any image regardless of its surface, and SiB (Share Images in One Box) enables users to easily share a box of selected images in a single file with just one click. Additionally, the Preview App Kit gives designers a new way to preview images through a familiar workflow without a second thought, creating a seamless experience between desktop and tablet for novices and pros alike. Last but not least, Photoshop is taking the reigns of the Adobe Creative Cloud, and designers can expect new tools to make creating amazing creations even easier. Thanks to the new Adobe Draft & Style plugin, users can quickly create beautiful wireframes, as well as create new styles from an existing style that has been saved for export. And new features in Photoshop for the Web make it even easier to design and create striking images for any surface. With new components for the Tab Bar and Navigation Bar, designers can now create their own ribbon bar for use in Photoshop CC, Photoshop CC Web or Photoshop Express. CSS Frameworks make it easier than ever to style elements using CSS, and improved Device Channel support means images can be shared device-to-device with no image conversion. With these innovative features, designers can create and work on images with the confidence that their creations will look great on any medium, and the assurance that they can access that quality on all of their computing devices -- from desktop to mobile.

It's time for us to look at the tech aspect of Photoshop, we've done this in some of our earlier tutorials, but don't worry, this will not be a long one. We'll show you some useful techniques that every photographer will fall for. Don't worry, this tutorial will not be too difficult but it could provide some nice features for you. This will cover:

- A primer on how to change the tab style for the name tags
- Customizing the default brushes that come with Photoshop (Static, Instagram, etc.)
- Some Photoshop techniques and tricks

The size of the update is not disclosed but according to Speck in the article above, **the new features will be coming in March 2021.** With that, we will wait to see what the latest update of Photoshop contains. We wish you the best of luck to manage the transition. Of course, the most important aspect, as every photographer knows is that we need to know the basics of Photoshop first. Even if you're a total noob, you must start with an action. This is pretty obvious but worth reinforcing. If you're an action creator, this gives you the chance to build your toolbox with some cool features. If you're learning Photoshop or starting from scratch, you should definitely start with an action. We'll show you the basics of how to create your first Action. The good thing about it is that if you're stuck with some action, you can always go back to it. Also, this action will help you build a decent workflow and save you time.
