1. Technical Field The present disclosure relates to display devices and, particularly, to a display device employing a touch screen.
2. Description of Related Art In the following description, a display device employing a touch screen refers to a display device employing a touch panel, i.e., a touch screen, to serve as an input interface of the display device. The touch screen is usually integrated with the display panel, so the display panel is thicker and heavier than a traditional display panel. Thus, the display device employing the touch screen is less attractive than a display device employing the traditional display panel. Therefore, what is needed is a display device employing a touch screen, which can overcome the above shortcomings. In recent years, research and development of portable information terminals has been actively conducted. One of the most important issues in portability of information terminals is reducing the thickness of a display screen. In order to achieve
