There are six tabs on the top of Photoshop CC. The tab you use depends on the task you are working on. The new Tab panel, shown here, is just one of the improvements. There is a second review of the options that are more easily accessed by going into the Edit menu. In addition to these and all prior Lightroom releases, the new version also features a new, free upgrade to get access to more free, third-party image-editing add-ons with many others yet to come. With the new Lightroom version, daily image-editing tasks are much, much easier. It's easier to cut, layer or resize 16 layers as a whole, for example. Apple's Aperture Three to One Cartwheel is still available for free. With this version, Adobe now allows full screen, full-screen or standard mode editing selections to each image in the screen shot, without switching it to full screen mode first. When you drag a selection out of full screen, the profile of your selection here is applied for the rest of the image. This includes the size of the selection itself as well as the selection's crop. This application is a complete no-brainer if you spend any time using Lightroom or Photoshop. Adobe's dramatic collection of premium and free online services are grouped under the name Adobe Creative Cloud. There's an Adobe ID, Adobe Stock, Adobe Analytics, Adobe Sign, and so on. Creative Cloud changed better background colors in CC 2019, and that, too, makes the editing experience here better than Photoshop 2018. Adobe's 'Save for Web' feature is robust and can flag images for cropping, resizing, and framing. Adobe's online Store now offers a new "T-T-P" rule for resizing.
